

Information Registration for the Safety Confirmation System

Doshisha University

Doshisha University introduced the safety confirmation system provided by NTT Communications, which will enable the university to swiftly grasp who is injured or missing at times of emergency such as disaster situations. Please make sure to carry out the initial registration and download the app to your smartphone.

What to do first	Step 1: Initial registration
	Step 2: App installation
If an earthquake occurs	Step 3: Automatic request for safety confirmation
	→ Input your safety status

Inquiries on the safety confirmation system: Department of General Affairs (doshisha-anpi@mail.doshisha.ac.jp)

Step 1: Initial registration

Reset your password from the email sent to your university-provided email address, and then set your personal email address and preferred language (Japanese or English).

1. Access the system via the QR code on the right or the URL (<https://www.sys.mc-anpi.com/ais/ac0101/?C=396496>) indicated in the “Initial Registration for the Safety Confirmation System” email sent to your university-provided email address.
2. Click on “Forgot Password?” at the bottom of the login screen.
(Do not enter anything in “Contract ID,” “ID,” or “Password”)

3. On the password reset screen, enter “396496” in “Contract ID,” your user ID in “ID” (four alphabetic characters + four numbers), and your university-provided email address in “Registered mail address.”

4. An email from “anpi@mob-connect.com” will be sent to the university-provided email address that you entered in “3.”. Click on the URL indicated in the email. When the password reset screen is displayed, enter your new password in “New: Password for Web” and “For confirmation” and then click on “Register.” Password registration is complete when the registration complete screen is displayed.

*The “New: Password for Web” is the password used only for the Safety Confirmation System.

Contract ID
396496 ← 396496

ID
← Your user ID

Password
← New password set in “4.”

Login

For Feature Phone
Forgot password?

6. You can choose your “Language (Japanese/English)” and register an “Email Address” other than your university-provided email address to which you wish to receive relevant emails in “Edit Personal profile” under the “Personal Menu” tab. If you register an email address, click on the “Send Test Email” button and check whether you have received the email. If you have not received it, revise your receiving settings.

Important notice

Do not change your “Office address”, “Address 1”, and the email address (university-provided email address) entered in “Priority 1”.

Step 2: Installation of the safety confirmation system app and device registration

You can respond to a request for safety confirmation from the university via the web screen or the app. Once the initial setting is complete, the app will allow you to enter information without having to log in again. Install the app so that you can react calmly in the case of a disaster. This app does not have the English version.

	Android version	iOS version
Availability	Android 4.4 to 9.0	iOS 10, 11, 12
App download	Google Play Store Search under “Biz 安否確認 ／一斉通報” or scan the QR code below↓ 	App Store Search under “Biz 安否確認 ／一斉通報” or scan the QR code below↓ 

1. Install the app.
2. After installation is complete, a screen titled “Biz 安否確認アプリ” will be activated. If you closed the displayed screen, click on the “Biz 安否確認” icon (above, on the right) and log in.

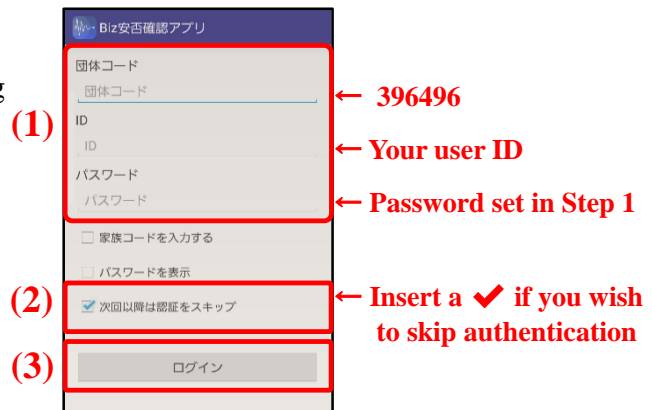

(1) Enter user information in the screen titled “Biz 安否確認アプリ”.

(2) You can choose whether to skip entering login information in (1) in the future. (Insert a ✓ if you wish to skip authentication)

(3) Log in.

(4) A completion screen will be displayed when device registration is complete. Your device will be registered with the safety confirmation system.

(5) Tap on “Close” to display the Top screen of the “Biz 安否確認” app.

Initial registration is now complete. The next page will explain how to respond in the event of an actual earthquake.

Step 3: Responding to a safety confirmation request

If an earthquake with an intensity of lower 5 or above occurs in Kyoto Prefecture or Osaka Prefecture, the safety confirmation system will automatically send a request for safety confirmation to the email address registered with the system, and the app will issue a push notification. In such a case, click on the URL indicated in the email and respond via the web, or respond via the app. You can use whichever method, but note that only the most recently registered response will remain if you respond multiple times. A retry will be sent if you fail to respond.

■ Responding via the web screen

1. Click on the URL indicated in the main text of the email from “anpi@mob-connect.com”
Email title: [Confirm Safety Status] Disaster occurred

This is the information from 【Doshisha Univ.】 Safety confirmation and simultaneous alert service.

Please access the following URL, and reply to the message.

<URL>

—— 【Doshisha Univ.】 Safety confirmation and simultaneous alert service ——

2. A safety status registration screen will be displayed. Choose an answer to each question and enter a comment (this is optional). A confirmation dialog will be displayed when you click on “Registration.” Then click on “OK.”

■ Responding via the smartphone app

1. Activate the smartphone app by tapping on “Open” on the notification screen. Tap on the message shown under the “Biz 安否” tab.

2. A safety status registration screen will be displayed. Choose an answer to each question and enter a comment (this is optional). A confirmation dialog will be displayed when you click on “Registration.” Then click on “OK.”
